

There is up to \$1,600 on a qualifying Lodi heat pump.

The public field preview: enough to spot the opportunity without putting unverified equipment thresholds or a rebate promise on the estimate. Active Resolv customers get the full one-page playbook instantly.

\$200 per qualifying AHRI cooling ton	8 tons catalog maximum - \$1,600	Existing home new qualifying air-source heat pump	6 months purchase or install to application
---	--	---	---

The three-part screen before you quote it

1 - UTILITY The address must receive residential electric service from Lodi Electric Utility. A Lodi ZIP code alone is not enough.	2 - EQUIPMENT Verify the complete AHRI-matched system. The exact efficiency thresholds are included in the full customer guide.	3 - DOCUMENTS The current claim requires the AHRI certificate and a complete final invoice. Keep model and serial records with the job.
